How we can help you

Managing research data is an integral part of the research process and is a requirement of major funders such as EPSRC, BBSRC, AHRC, MRC and the Wellcome Trust. Well managed data will ensure:

- funders' requirements and compliance are met
- research data is easy to locate and identify
- datasets can be used by others in the future
- risks associated to loss of data are minimised

The University of Nottingham is committed to providing its research community with training, support and guidance across the research data lifecycle. We can offer advice and guidance on:

- data management planning
- creating, sharing and re-using data
- backup and storage
- data archiving and preservation
